During my studies in German Literature, I acquired a great interest in software development. I have studied programming languages and how to design applications on my own. I started with the basics and developed myself into a proper mobile application developer.

Skills

- Cross-platform mobile applications with React Native, Flutter, Xamarin and Apache Cordova
- Native iOS and Android applications with Kotlin, Swift, Java and Objective-C
- Project design & architecture
- Working with big teams, collaborating and planning.
- Design systems
- Testing frameworks
- Limited experience with backend technologies such as Node.js, .NET, flask, django, Spring.

Work Experience

Senior Mobile Engineer, Wolt, Berlin/Germany (01.2024 - Present)

Working in courier group, providing mobile solutions.

Senior Software Engineer, Delivery Hero, Berlin/Germany (06.2023 - 12.2023)

Working on Ad-Tech providing advertising solutions for clients.

Senior Mobile Engineer, Personio, Berlin/Germany (08.2022 - 05.2023)

We use React Native to recreate the Personio application. Personio is the modern all-in-one HR Solution made for SMEs.

Senior Mobile Engineer, heycar, Berlin/Germany (08.2020 - 08.2022)

I work with technologies such as React Native and Redux in the mobile application team. Heycar is an exclusive platform for high-quality second-hand cars.

React Native Developer, Cara Care, Berlin/Germany (09.2019 - 08.2020)

We develop a healthcare application and system mainly focusing on IBS in addition to other diseases and disorders. With the personal care system in this application, it is aimed to give a better life to the people with these problems.

Senior Full-Stack Software Developer, WittyCommerce, part of Emakina Group, Izmir/Turkey (04.2019 - 08.2019)

The main task I had in this company was to take place in multiple teams and develop e-commerce technologies mostly using Salesforce for other companies.

Full-Stack Software Developer, Blacc Enterprises, Izmir/Turkey (12.2018 - 04.2019)

Developing a marketplace with a team of 5, I work as a full-stack developer and mobile developer, using technologies like Vue.js, .NET Core Web Api, React Native, Dapper, Elasticsearch.

Full-Stack Software Developer, Orion Yazilim, Izmir/Turkey (05.2017 - 12.2018)

Returning to this company I had more responsibilities and bigger projects to manage. I managed a

small team of 2. I designed and developed almost everything about the projects using the resources we had. I continue to develop both mobile and web applications.

I mainly focused on web projects, that make a use of web services, opening a way to mobile applications for the same project. I was responsible for both the front-end and the back-end of the projects even though my forte is back-end. We built B2B, B2C and CRM services from the ground up. I was able to keep up with the newest technologies available thanks to these projects.

Game Developer/Self-Employed, DarkLapse (06.2016 - 12.2017) www.darklapse.com

I have always wanted to develop my own games, so I learnt how to do it through Unity and started doing it in my free time. I have already developed two mobile games using the software products listed above. I believe doing such a thing alone has added a lot to my skills.

Mobile Application Developer, Orion Yazilim, Izmir/Turkey (02.2015 - 06.2016)

First started working here as an intern after learning how to code and then joined the ranks as a software developer. I learned to work with a team and develop various applications for both mobile devices and web. Even though the company is focused on e-commerce we received lots of custom projects. We focused mainly on Android and iOS applications. I was responsible for both the applications and their web services.

Education

Ege University (2011 - 2016)

German Language and Literature (bachelor's degree)
Honorary degree – GPA: 3.06/4

Language Skills

Turkish – Native English – Fluent German – Good
